Projects

Chat-Ji | [Link](#)

- Built a real-time chat app where people can send and receive messages instantly, with a smooth and responsive design that works across devices.
- Added secure login and made sure the system can handle many users chatting at the same time without slowing down.

StyleHub | [Link](#)

- Built a clean, responsive shopping experience where people can browse products, use quick filters, and add items to the cart smoothly on both mobile and desktop.
- Polished the small details—fast page loads, clear product pages, and helpful feedback (like toasts and disabled states)—so it feels easy and reliable to use.

Bubble Game | [Link](#)

- The player must quickly click on the correctly numbered bubble before the timer runs out.
- The game features a dynamic interface with a glassmorphism-inspired design, engaging sound,a countdown timer, and real-time score tracking.
- It's a fun way to test reactions and improve focus while demonstrating core JavaScript skills.
